

Introduction of an Online Configurator for iso175 - Customized

Product Change Notification

Product family	Manufacturer part number	Department/ location
Iso175 Customized	B91068200	BU-E
Type of change	Classification of change ¹⁾	Product Category
Adjustment	C	Vehicle sensors

¹⁾ A: Stop of production or design change with influence of approval
B: Small change in design without influence of approval
C: No influence of product

Description of Change

[New online configurator for the iso175 Customized variant \(B91068200\)](#)

Reasons for change

The new online configurator simplifies the configuration process and provides improved user guidance, parameter descriptions and plausibility checks. In addition, a unique retrieval code is generated for each configuration. This code allows previously created configurations to be easily retrieved and reused, eliminating the need to retain or search for the original configuration file.

Key characteristics of change

Effective 1 September 2026, the new web-based configurator will replace the existing Excel configuration file for the iso175 Customized variant.

After completion of the configuration, the online configurator generates a CSV configuration file containing the selected parameters. The configurator will be accessible via the iso175 product page on the Bender website from 1 September 2026.

Engineering change effects on follows

This change affects the configuration and ordering process only. There are no changes to the hardware, dimensions, electrical characteristics or certifications of the iso175.

Purchase orders received by Bender on or after 1 September 2026 can only be processed if they are accompanied by a CSV configuration file generated by the new online configurator. The previous Excel configuration file will no longer be accepted or available.

Forecast key milestones

Time schedule	Previous configuration Method	New configuration method
Product name	Iso175 Customized	Iso175 Customized
Manufacturer part number	B91068200	B91068200
Configuration method	Excel configuration file	Online configurator with CSV output
Effective Date	Accepted until 31 August 2026	Mandatory from 1 September 2026
Product Change	None	None
